

# New Product Release

**XRS™ CONNECT –  
THE NEXT GENERATION**

**GME**

XRS™ Connect is an Australian Made radio platform designed to be smart, adaptable, and rugged.

Building on the strong heritage of our first generation of XRS™ Connect radios, the all-new XRS™ range once again raises the benchmark for UHF CB Radios, with numerous advancements in technology ensuring GME remains at the cutting-edge of two-way radio communication.

The next generation of XRS™ radios boast a suite of innovative new features including a powerful 3-watt speaker, IP67-rated microphone, high-contrast Colour TFT LCD screen, built-in GPS receiver, Bluetooth Audio connectivity, Noise Reduction technology, and multiple user-customisable buttons.

GME's relentless focus on research and development, combined with extensive consumer feedback and in-field testing, has resulted in a range of products that set a new standard for Two-Way Radios globally.
